

# Coaching

**The Coaching Program** provides feedback, advice, and direct assessment on decisions and presentations/briefings in a one on one environment.

*'Every problem requires both a solution and the communication of that solution'*

Your coach has over **4000 hours presentations and decision making process training experience in the public and private sector.**

- **Coaching and Mentoring**—One-on-one is a powerful way to jump-start your problem solving skills. Middle managers and salespeople receive individual coaching and mentoring to solve problems in their companies, their departments, or with their customers.

*With an individual plan of action and support, learn how to:*

- Identify the problem, not just the symptom
- Gather all the facts, COAs, & critical assumptions
- Create criteria to measure the courses of action
- Test the possible courses of action
- Select and implement the best course of action

## **Leadership Applied**

*Fix problems, not blame!*
